

Fat Fire Extinguisher (rechargeable extinguisher)

F 6 SKM

F 9 SKM

Description

Reliably extinguishes burning fat and cooking oil

Whether in restaurants, domestic kitchens or in the food industry: The right choice of fire-fighting equipment should be a top priority wherever grease, fat and oils get heated. That is because fat fires harbor particularly insidious hazards. Thanks to their high fire suppression capacity, with the two high-quality and practice-oriented NEURUPPIN fat fire extinguishers F 6 SKM and F 9 SKM, even inexperienced users can fight a fire safely, effectively and powerfully. These rechargeable extinguishers work with 6 or 9 l of the extinguishing agent NEUFROL M. They fight fat and cooking oil fires very effectively and reliably prevent grease explosions and re-ignitions caused by chemical reactions. However, the extinguishers are not just suitable for fire class F (as defined in EN 3-7). They are also extremely effective against burning solids (fire class A).

Quality extinguishers, Made in Germany.

In keeping with all NEURUPPIN fire extinguishers, these two rechargeable appliances for fat fires embody exceptional user-oriented functionality combined with rugged Made in Germany quality. The rotary pistol grip, for example, enables extinguishant to be directed very accurately and a long service life is assured by the 1 mm thickness of PE interior coating which protects the steel tank against corrosion.

Applications

- Fire-fighting for fire classes A and F
- Restaurants
- Canteens
- Fast-food restaurants
- Hotels
- Snack bars
- Bakeries
- Laboratories
- Domestic

Special advantages

- Great fire suppression power – creates safety reserves
- Large discharge width – up to 5 m for high safety standards, also for inexperienced users
- Rotary pistol grip - for ergonomically optimum fire-fighting
- Specialist 6-fold swirl nozzle - for optimum distribution and application of extinguishant
- Complies with EN 3-7 – suitable for reliable suppression of grease and cooking oil fires
- Easy to actuate – intuitive, fitted with an impact button
- Convenient design – comparatively lightweight with an ergonomically optimum design
- No electrical hazards – great safety through application tests on electrically live systems (up to 1,000 V at distances of at least 1 meter)
- Safe ex-factory – 100% pressure-testing of every cylinder
- Corrosion protection included – Steel body with high-quality, red powder coating (TGCI-free) and additional 1 mm thickness of PE inner coating, double quality testing procedure
- Accessories available – wall bracket, vehicle holder and optional plastic base ring
