

Water extinguisher (rechargeable extinguisher) W 6 Ai-TF-1 -30/60 °C

Description

Cost-effective fire protection down to -30°C.

Water is a highly effective, environmentally friendly and economical fire suppression agent against solid fires (fire class A). The powerful NEURUPPIN W 6 Ai-TF-1 rechargeable water extinguisher is therefore the right tool for the job wherever potentially flammable materials such as wood, textiles or plastics need to be protected from fire. With its anti-freeze additive, this high-quality fire extinguisher is able to operate reliably down to -30°C, making it suitable for unheated rooms or outdoors.

Robust, durable and powerful.

In keeping with all NEURUPPIN extinguishers, the W 6 Ai-TF-1 scores highly with robust Made in Germany workmanship, well thought-out, user-friendly ergonomics and, above all, high performance in fire fighting. For example, the fittings are corrosion-protected and made of high-quality metals. The cylinder, welded from robust steel, is 100% pressure-tested before leaving the factory.

Self-explanatory functionality for effective fire-fighting operations.

The design is self-explanatory to ensure that even inexperienced personnel can operate the rechargeable water extinguisher reliably in the event of a fire. Pull the safety pin, press down the impact button fitting and direct the agent jet against the fire using the practical dosing pistol. Thanks to the length of operation, of up to 76 seconds (Rating A 21), fires can be fought effectively, preventing more extensive damage.

Applications

- Fire-fighting for fire class A
- Public facilities
- Farming & forestry
- Local public transport
- Regional & cross-border passenger transport
- Transport of goods & long-haul freight
- Manufacturing & trades
- Transport sector
- Warehouses & refrigerated storage

Special advantages

- Great suppression power – creates safety reserves
- Frost-protected – operationally capable down to -30°C
- Large discharge width – up to 6 m for high safety standards, also for inexperienced users
- Rotary pistol grip - for ergonomically optimum fire-fighting
- Easy to actuate – intuitive, fitted with an impact button
- Convenient design – comparatively lightweight with an ergonomically optimum design
- No electrical hazards – great safety through application tests on electrically live systems (up to 1000 V at distances of at least 1 meter)
- Safe ex-factory – 100% pressure-testing of every cylinder
- Ease of maintenance – large service aperture and repeat parts
- Corrosion protection included – Steel tank with high-quality, red powder coating (TGCI-free) and additional 1 mm thickness of PE inner coating, double quality testing procedure
- Accessories available – wall bracket, vehicle holder and optional plastic base ring
- Fire extinguisher registration – in acc. with DIN EN 3 and pressure device directive (EC)

Technical data

W 6 Ai-TF-1

Fill quantity (l)	6
Extinguishing agent:	Neufrol C-30
Rating:	21 A
Extinguisher units (LE)	6
Temperature (°C):	-30 / +60
Weight (kg):	12
Width (mm):	260
Height (mm):	484
Length of operation (s):	up to 37
Discharge width (m):	up to 6
