

Mobile powder extinguisher PG 50 A (charging extinguisher)

Mass with class in the fight against NBC fires – even at sub-zero temperatures

With a whopping 50 kg of NBC extinguishing agent and a highly manoeuvrable and smooth-running chassis, the mobile NEURUPPIN PG 50 A charging extinguisher is an ideal weapon against all common fires involving solids, liquids and gases. With its top rating (A / IIB / C), the robust and high-quality extinguishing device "Made in Germany" offers ideal protection against damage caused by fire. The practice-oriented, well thought-out design for fast, highly effective extinguishing attacks also contributes to this.

Drivable maximum power for large fire loads

The high-performance ABC powder extinguisher PG 50 A was designed by the German NEURUPPIN fire extinguisher technicians for fire protection in areas with large fire loads - for example warehouses, multi-storey car parks, heavy chemical industry, power plants, energy companies, agriculture, airports, transport and shipping. In addition to its large amount of extinguishing agent, the device also scores points for firefighting with its throwing distance of over 5 m and a spraying time of up to 37 s.

Solid, solid and frost-resistant

The robust, powder-coated chassis consists of welded steel profiles and, with its support bar, offers an optimal centre of gravity as protection against falling over. In addition, the large wheels allow easy movement even on uneven ground. The 100% pressure-tested steel container with red plastic coating also stands for quality "Made in Germany". In addition, the PG 50 A is also ready for use in frost down to -30 °C. This means that the powerful extinguisher is also suitable for areas with a risk of frost, such as outdoors or in unheated rooms.

Applications

- Firefighting of materials of fire classes A, B, and C
- Heavy and chemical industry
- Power plants
- Heating systems
- Agriculture
- Multi-storey car parks, large garages
- Hospitals
- Airports
- Transport
- Shipping
- Waste management
- Mining

Special advantages

- **High extinguishing performance** – A/ IIB/ C
- **Frost-protected** – application range -30 °C to 60 °C
- **Stable and flexible** – 2 wheels and support brackets for optimal centre of gravity prevent falling over
- **Long hose** – optionally 5 or 10 m with extinguishing gun for extinguishing attacks from several sides
- **Robust steel container** – 100% pressure test for safe use
- **Long throw distance** – approx. 5 m for safe use
- **No electrical hazards** – maximum safety (up to 1,000 V, 1 m minimum distance)

Technical data

PG 50 A (charging extinguisher)

Capacity (kg):	50
Extinguishing agent:	ABC 40
Rating:	A/ IIB/ C
Temperature (°C):	-30 / +60
Weight (kg):	85
Width (mm):	455
Height (mm):	1,115
Duration of function (s):	37
Throw distance (m):	5
Approvals:	EN 1866
